

Profile

Veer Architecture, PLLC provides Total Development Solutions through partnerships with clients and communities. Our firm is dedicated to the concept of delivering practical design solutions, not just pretty pictures. In today's increasingly complex matrix of financial, regulatory, and technical constraints, clients need problem solvers. We recognize that the best looking design means nothing if it is not clearly described in construction documents that can be approved through the bureaucratic process and built within a financially feasible budget.

Key Staff

The firm's principal, Kent Smutny is a licensed architect registered in the state of Washington. In addition, Kent has his NCARB certification and has his LEED Green Associate designation. The office is staffed with professionals possessing analytical tools from a variety of architectural fields. We at Veer Architecture PLLC are focused on delivering practical, well thought out projects that are adequately described in clearly assembled construction documents utilizing Autodesk Revit in order to make use of Building Information Modeling (BIM). We deliver solutions.

Project Experience

There is no substitute for experience. Kent Smutny has more than 25 years of experience producing high quality, cost effective projects that respond to the needs of his clients and the demand of the market place. Kent Smutny has designed a wide range of different projects. While multi-family design is the mainstay of the firm, Kent and his staff at Veer Architecture PLLC also have experience with commercial, office, retail design, site planning, tenant improvement, and single family design. With a vast background, Veer Architecture PLLC has the experience to address the site, environmental, sustainable, and programatic issues that are likely a part of your project.
